

Your area is under consideration from the state of Illinois to receive grant relief for telecommunication companies to provide fiber optic internet in your area. Illinois Fiber Connect has a strong commitment to providing this solution to rural areas in Illinois, by applying for grants it allows us to get YOU service which would be very difficult otherwise. If you currently do not have access to 25 Mbps download and/or 3 Mbps upload, then your household qualifies for our grant application.

The next step is to fill out the included form and email it to fiber@ilfiberconnect.com. You may take a picture or scan it and send it to that email. We then use this form to show the state of Illinois when we apply that your area **needs** access to a higher quality internet solution.

After our application is submitted, we are expecting a response by mid to late summer 2020, which we will pass on to you. To stay up to date on the grant information please follow our Facebook page, Illinois Fiber Connect. We cannot wait to be your service provider, please go to illinoisfiberconnect.com to see all of our packages.

Illinois Fiber Connect is a joint venture between Wabash Communications (Louisville, IL) and EJ Water (Dieterich, IL), which brings Fiber-to-the-Home technology to residents around the Midwest. This fiber technology allows our customers to have access to ultra-fast internet with speeds to homes and businesses up to 1 Gbps (1,000 Mbps). Founded by EJ Water CEO, Bill Teichmiller, and Wabash Communications EVP/GM, Barry Adair, the mission of the joint venture is to provide rural communities access to a stable, secure high-speed internet connection.

"Inspiring growth as we digitally cultivate our rural communities."
